Spina (A.)—History of Tuberculosis from the Time of Sylvius to the Present Day, being in part a Translation, with Notes and Additions, from the German of Dr. Arnold Spina: also an Account of the Researches and Discoveries of Dr. Robert Koch and other recent Investigators, by Eric E. Sattler, M.D. 12mo. cloth, pp. 191. *Cincinnati*. 6s. 6d.

The first five chapters are a free translation, with a few notes and additions, of the first part of the very valuable work of Dr. Arnold Spina, entitled "Studien über Tuberculose," which has just appeared in Germany. Dr. Spina is a most formidable critic and opponent of the theories of Dr. Koch, the discoverer of the *Bacillus tuberculosis*. The sixth and seventh chapters are new. Spina brought his history down only to the time just preceding Koch's experiments. These two chapters contain an account of the investigations of Koch and of the various subsequent experiments of other investigators, and their attempts to verify or to overthrow his conclusions. They include a full description of the latest experiments of Dr. Spina, in which he claims to have disproved Koch's theories. A sketch of Koch's reply to Spina is given also. These additions bring the history of tuberculosis down to March, 1883.

The scope of this (the 10th) census is much larger than that of any previous years. It has collected for the first time the statistics of railroads and telegraphs, of fire, marine, and life insurance; while in the departments of agriculture and manufactures the information obtained is at least double in mere matter of bulk, to what has hitherto been obtained. In the inquiries respecting taxation and public debts, the investigations of the census have been extended to embrace an amount of detail which exists in regard to the public indebtedness of no other country of the world.

"Under the technical and somewhat unattractive title of 'Dynamic Sociology,' Mr. Ward has made an original and able contribution to the large and very important subject of social science. Although he is, of course, indebted to many sources for his materials, yet the handling of the topics is his own. His work is not a compilation or résumé of previous promulgations, but an elaboration of his own independent views; and he has constructed a system which, from its breadth, its scientific basis, and its elaborate method, lays claim to the character of a philosophy."—*Popular Science Monthly*.

- This is the German translation with notes of the so-called "Theologia Aristotelis," announced in Dr. Dieterici's edition of the Greek text, which we noticed on a previous occasion (*RECORD*, Nos. 181-2). The introduction treats on the authorship of the original,—but we must confess that in spite of Dr. Dieterici's eloquent assertion, we have not yet been able to form an opinion on the question, whether Aristotle or Proklus or Porphyrius or some other Greek philosopher was the author of this very important work. The translation reads very smoothly, and has every appearance of being done with accuracy.

- Guest.—*Origines Celticae* (A Fragment), and Other Contributions to the History of Britain. By Edwin Guest, LL.D. D.C.L., F.R.S., late Master of Gonville and Caius College, Cambridge. With Maps, Plans, and a Portrait Engraved on Steel by G. J. Stodart. Three Volumes. Demy 8vo. 32s.
- Of the parts which compose these volumes, the *Origines Celticae* is an attempt to trace the earliest known inhabitants of our island, through the pre-historic times, in their progress from the original home of our race to their settlement in Britain. This was to be done by a careful and discriminating examination of geographical names, mythological traditions, and ethnological associations, coupled with bold and ingenious speculations in philology and the interpretation of ancient monuments. The author died, leaving the work incomplete; and it was impossible for any one else to take up the threads of a task so complex. But it is thought, fragmentary as it is, it may still give pleasure and instruction to those who can appreciate the learning and enthusiasm, the acute insight and unsparing labour which were devoted to its elaboration. The second volume, which is in a yet more fragmentary state, deals with the historical, legendary, and fabulous traditions which are found within Britain itself. Among the subjects treated are: *The Early English Settlements in South Britain*, *The Four Roman Ways*, and *The Invasion of Britain by Julius Caesar*.

- Petermann, Windischmann, de Lagarde, and Fr. Müller took the Old-Armenian language to be of Iranic origin, because it contained many Persian words. Hübschmann, however, proves that these words were merely imported, and that therefore Armenian was no more Iranic than English is Romanic because it contains many Romanic words. The first part of the "Armenische Studien," which we have now before us, contains only the "Elements of Armenian Etymology."

ARCHÆOLOGICAL SURVEY OF INDIA.

INDIA is rapidly increasing in interest, not only to statesmen, merchants, and manufacturers, but also to tourists and artists, as well as to students of natural history and philology, and every branch of antiquarian research. Being the cradle and home of some of the most remarkable religious developments still holding sway over by far the greater part of the vast population of Asia, a knowledge of Indian literature, history, and art has become an interesting study to the general reader as well as to the Orientalist.

It has long been recognised that the Ancient Monuments of India are tangible embodiments of the ideas of their builders, and of the age to which they belong; as such they deserve careful attention, and are full of instruction in their various relations to architecture, sculpture, religion, and history. Comparative palæography and architecture render invaluable aid in arranging these remains in chronological order, and thus making them tell the history of Indian art and of the ideas it embodies.

The illustration of Indian Architecture, especially as exhibited in the numerous and often elaborately sculptured Cave Temples of the Buddhists, Brahmans, and Jains, and other antiquities of Peninsular India, is now being systematically carried out by the Archæological Survey, instituted in 1870, in the various Presidencies of India, and that part of it conducted by Dr. Burgess in Western India is made accessible in the following works, published by authority of Her Majesty's Secretary of State for India in Council.

A HISTORY OF BURMA.

INCLUDING BURMA PROPER, PEGU, TAUNGU, TENASSERIM, AND ARAKAN.

From the Earliest Time to the End of the First War with British India.

By LIEUT.-GENERAL SIR ARTHUR P. PHAYRE, G.C.M.G., K.C.S.I., AND C.B.;

Membre Correspondant de la Société Académique Indo-Chinoise de France.

Notwithstanding the many articles by competent authors which have appeared on the History of Burma, no one has yet published in any European language a continuous history of the country, whereby the rise and progress of the monarchy and of the people might be traced, and the succession of events recorded, with their relation one to another explained.

"Sir Arthur Phayre's contribution to Trübner's 'Oriental Series' supplies a recognized want, and its appearance has been looked forward to for many years. . . . Is a worthy, if hardly needed, monument to his name. We may regret the loss of the quaint tales and the amusing braggadocio of the Burmese palm-leaves, but no exception can be taken to the judicial accuracy of our author's pages."—*The Saturday Review*.

Post 8vo. cloth, pp. xxxii. and 335. Price 10s. 6d.

Opinions on the same translation by the Author, published in 1882.

"Mr. Whinfield has executed a difficult task with considerable success, and his version contains much that will be new to those who only know Mr. Fitzgerald's delightful selection."—*Academy*.

"The most prominent features in the Quatrains are their profound agnosticism, combined with a fatalism based more on philosophic than religious grounds, their Epicureanism, and the spirit of universal tolerance and charity which animates them."—*Calcutta Review*.

HISTORY AND USES OF LIMESTONES AND MARBLES

By S. M. BURNHAM.

WITH FORTY-EIGHT CHROMO-LITHOGRAPHS.

This work occupies a new field and it is hoped it will be found of great value and interest to Students of Geology, Architecture, and Sculpture, as well as to general readers and travellers.

The Illustrations are from some of the finest specimens of antique and modern marbles.

"The author classifies and describes the principal limestones and those varieties thereof known as marbles, alabasters, etc., found throughout the whole civilized world. He gives us their geological position, their chemical constituents and their economic uses and value, with elaborate precision and completeness. His efforts have been well seconded by the chromo-lithographer, who has furnished forty-eight illustrations of polished marbles, which are of a very high degree of excellence indeed. We had selected some of the plates for special mention, but we would prefer to send our readers to the book itself, which will probably become the standard work on the subject of which it treats."—*Builder*.

The one essential qualification of Dr. Clarke for the task he has performed, and which is manifest in every section of the book before us, is his appreciation of whatsoever things are true and good in all religions. By A. T. MAHAN,
Commander U. S. Navy.

The achievements of the Naval Force on the Mississippi and its tributaries, and on the Gulf and the Red River, either independently or in co-operation with the Army, form one of the most thrilling chapters in the history of the Civil War. The exploits of Farragut, Foote and Porter, with their gallant crews and improvised vessels, teem with acts of daring, marvellous escapes, and terrific encounters. Commander Mahan has done full justice to this side of his narrative, but he has given at the same time a record of this part of the war that has greater claims to historic value than any which have preceded it.

THE MAYA CHRONICLES.

Edited by DANIEL G. BRINTON, M.D.

This volume contains five brief chronicles in the Maya language of Yucatan, written shortly after the Conquest, and carrying the history of that people back many centuries. Four of these have never been published, nor even translated into any European tongue.

To these is added a history of the Conquest, written in his native tongue by a Maya Chief, in 1562. This also is from an unpublished MS.

The texts are preceded by an Introduction on the History of the Mayas; their Language, Calendar, Numerical System, etc.; and a Vocabulary is added at the close.

A limited number of copies of this work still remain on hand.

"We hope that Dr. Brinton will receive every encouragement in his labours to disclose to Americans these literary antiquities of the continent. He eminently deserves it, both by the character of his undertaking and the quality of his work."—*The American*.

"It would be difficult to praise too highly the task Dr. Brinton has set before him. Prepared by long studies in the same field, he does not undertake the work as a novice. . . . There should be no hesitation among those who wish well to American antiquarianism in subscribing to the series edited and published by Dr. Brinton."—*The Critic*.

"Dr. Brinton's work upon the history of the Mayas or Aborigines of Yucatan [the "Maya Chronicles"] is a most important contribution to the literature of American antiquities. . . . Comparative linguists as well as archaeologists will find a new and very interesting subject of study in these remains."—*The Saturday Review*.

"The efforts of Dr. Brinton will be welcomed by all antiquarian students, for they are not only original contributions, but are also presented in a readable and interesting manner."—*The American Antiquarian*.

No. II. 8vo. cloth, pp. v.—222. Price 14s.; paper, 12s.

THE IROQUOIS BOOK OF RITES.

Edited by HORATIO HALE, M.A.,

Author of "The Ethnography and Philology of the U. S. Exploring Expedition," etc.

The Book of Rites of the Iroquois is a native composition, partly in the Canienga (or Mohawk) and partly in the Onondaga language. It comprises the speeches, songs, and other ceremonies which, from the earliest period of the confederacy, have composed the proceedings of their council when a deceased chief is lamented, and his successor is installed in office. The fundamental laws of the League, a list of their ancient towns, and the names of the chiefs who composed their first council, are also comprised in the work. It is valuable, not merely for its historical import, which may be said to carry back the authentic history of Northern America to a period fifty years earlier than the era of Columbus, but also for the new light which it casts upon the Indian character and social life.

The introduction, in ten chapters, treats of the ethnology and history of the Huron-Iroquois nations, the Iroquois League and its founders (Hiawatha, Dekanawidah, and their associates), the origin of the Book of Rites, the composition of the Federal Council, the clan system, the laws of the League, and the historical traditions relating to it, the Iroquois character and public policy, and the Iroquois language. A map showing the location of the United Nations and of the surrounding tribes, notes, and a glossary completes the work.

Other Volumes in Preparation are:

The National Legend of the Creeks.

Edited by ALBERT S. GATSCHET.

Mr. Gatschet will present (1.) The original German account, written in 1735, by which this legend has been transmitted; (2.) Its English translation; (3.) Its re-translation into the Creek language, in which it was originally delivered, by an educated native; (4.) Its translation into the Hitchiti, a dialect cognate to the Creek; (5.) Glossaries and ethnographic notes.

The Comedy-Ballet of Güegüence.

Edited by DANIEL G. BRINTON, M.D.

This curious specimen of native humour is written in the mixed Nahuatl-Spanish dialect formerly spoken by the natives of Nicaragua, and was acted by them at certain festivals, up to a very recent date. It is the only specimen of the native comic *bailes* known.

The Annals of Quauhtitlan.

Edited by A. F. BANDELIER.

The original Aztec text, with a new translation. This is also known as the *Codex Chimalpopoca*. It is in itself one of the most curious and valuable documents in Mexican archaeology, and the thorough manner in which Mr. Bandelier works is well known to all students of American antiquity. He is now in Mexico, engaged in preparing this edition, and it will undoubtedly take rank as one of the most valuable of the series.

AN INTRODUCTION TO
THE MAITHILI LANGUAGE OF NORTH BIHAR.
CONTAINING A GRAMMAR, CHRESTOMATHY AND VOCABULARY.

By G. A. GRIERSON, B.C.S.

"He issued printed paradigms of all the Sanskrit and Hindi nominal and verbal inflections, circulating them widely amongst the native schoolmasters, Pandits, and educated gentlemen, with directions to give the exact corresponding form in the local dialect. The returns thus obtained consisting of some fifty more or less complete books of forms from all parts of the country, were then carefully compared, sifted, and checked by the writer's own knowledge, and the result is this excellent grammar of a most interesting neo-Sanskrit language, hitherto almost unknown to philologists."—*The Academy*.

"Mr. Grierson's Grammar is a very full one and is based on extensive and careful personal investigation. Upwards of fifty books of paradigms were drawn up from different sources, and a comparison of these forms showed so little discrepancy that there is good reason to hope that the conclusions based on them will prove fairly accurate."—*The Englishman*.

"The labour which Mr. G. A. Grierson has undertaken to bring to the notice of Government these varying, yet closely allied languages of Bihar, and to make them known to philologists, is one of a very praiseworthy, though highly onerous nature ; and their value may be in some fashion estimated."—*The Indigo Planter's Gazette*.

"He has done much to throw new light upon the nature, morphology, and construction of an obscure, but interesting, dialect."—*Hindu Patriot*.

GLORIA.

A NOVEL.

By B. PEREZ GALDÓS.

From the Spanish, by CLARA BELL.

"As a Sketch of Spanish life alone 'Gloria' has the charm of novelty, to which it adds the attraction of a very powerful and pathetic style. So real and fascinating are the word-pictures traced by the author's pen, that it is difficult not to condone the one fault of his book. This consists in his having made religious antagonism the pivot on which the whole story turns. Yet it is certain that in this case they intensify the plot of an absorbing romance, which the clever translator has rendered into English with much ease and grace."—*Morning Post*.

In One Volume. 16mo. cloth, pp. 264. Price 4s.; paper edition, 2s. 6d.

MARIANELA.

By B. PEREZ GALDÓS.

From the Spanish, by CLARA BELL.

"Galdós is not a novelist in the sense that now attaches to that much abused word, but a romancer, pure and simple, as much as Hawthorne was, though his intentions are less spiritual, and his methods more material."—*Mail and Express*.

The Life and Works of Giordano Bruno.

Giordano Bruno died in the year 1600. He had lived several years in England, moving in the best society, enjoying the friendship of Sir Philip Sydney and other men of mark, and, according to his own statement, defended certain theses before an audience of learned men at the University of Oxford. In his "Speccio de la Bestia Trionfante," printed in 1584, during his stay in England, he revived the ancient idea of the migration of the soul, which, though lingering still in popular tradition, had been dormant during the middle ages.

The Philosophy of the Unconscious.

By EDWARD VON HARTMANN.

Translated from the German by W. C. COUPLAND.

There must necessarily be a close alliance between true merit and success—else the unexampled success of Hartmann's "Philosophy of the Unconscious" would baffle all reasonable explanation. But its cause is perhaps not far to seek; the author of the work is one of the most gifted, yet independent, disciples of Schopenhauer, whose system of Philosophy he exhibits in a masterly way, attempting at the same time to harmonize it with those of Hegel and Schelling. As he is, moreover, master of a lucid and elegant style, a larger number of general readers has been attracted by and fascinated with the work than is, as a rule, the case with works on metaphysical subjects. The outcome has been the sale of Ten Editions of the German original since its first appearance. It could not be otherwise than that a lively desire should have arisen in England, as well as in the United States, for the appearance of a faithful translation; and it is surprising that it has not been attempted before. Probably the extraordinary difficulties of the task have hitherto deterred intending translators. But however that may be, it is believed that the present translator—an ardent student of German philosophy—has successfully coped with the difficulties of the task, and that his translation will satisfy all reasonable expectations.

The World as Will and Idea.

By ARTHUR SCHOPENHAUER.

Translated from the German.

By R. B. HALDANE, M.A., and JOHN KEMP, M.A.

It is now fully sixty years since Schopenhauer's Opus Magnum—destined to work a revolution in the philosophical speculation of the century—made its first appearance. Still, such was the indifference exhibited towards this work by the author's contemporaries occupying the chairs of philosophy at the different German Universities, that a few years after its appearance, the greater part of the edition found its way into the paper-maker's tub. It was only towards the close of the first half of the present century that a reaction set in, and that the work, hitherto unaccountably neglected, commenced to assert its claims to the attention of the public. Since then, edition has followed edition in rapid succession.

It must be said to the credit of an Englishman (John Oxenford), that to an article of his in the *Westminster Review*, which created quite a sensation at the time, and which reacted powerfully on German opinion, the tardy recognition of the great philosopher is in some measure due. A translation of the work has long been needed, but the difficulties were great, and several efforts in that direction were killed in the bud.

Mr. TRÜBNER is making arrangements with competent Scholars for the early preparation of Grammars of SIAMESE, JAPANESE, and CHINESE, particulars of which will be shortly announced.

"In the 'Simplified Grammar of Hindustani, Persian, and Arabic,' by E. H. Palmer, M.A., we have the earliest of a series of improved and abbreviated Grammars, at once most interesting and useful, which is to be extended over the whole range of important languages. The object will be to provide a concise but practical introduction to each tongue for students, and at the same time to furnish comparative philologists with a clear and easy view of their structure. The accomplished author of the first specimen of the design, in boldly grouping the Semitic Arabic with Hindustani and Persian, sweeps away all the old verbiage of the grammarians, and reduces Accidence and Syntax to the simplest principles."—*Daily Telegraph*.

"A great boon to students and young beginners in the study of these languages, and for candidates for the Indian Civil Services, and military officers in their examinations in India, is well adapted to afford great help, as indeed to all those who contemplate studying Oriental languages."—*United Service Gazette*.

To be published in Numbers, monthly if practicable, if a sufficient number of copies be subscribed for.

Price per Number 2s.

THE LEGENDS OF THE PANJAB.

By Captain R. C TEMPLE, Bengal Staff Corps,

Fellow of the Royal Geographical Society, Member of the Royal Asiatic and Folklore Societies, the Anthropological Institute, and the Asiatic Society of Bengal.

The Legends will be given in original, in the Roman character, with translations, but without notes, the object of the publication being to record, in a form useful to investigators, the stories and legends preserved in the memories of the wandering bards of the Panjâb. These men are the chief repositories of the folk-tales of the people, and year by year under British rule they are becoming fewer and fewer. Their disappearance eventually as a class is a mere question of time. They are always entirely uneducated, and their songs are invariably composed in the ordinary colloquial of their homes. Their recitations are therefore not only valuable as folklore, but are precious records of the Panjâbî dialects of the day.

The following *twenty* legends have been already collected directly from the lips of the bards themselves, and it is hoped that in time many more will be added to their number.

Rasâlû Class of Legends.

The Adventures of Râjâ Rasâlû, from Râwal Piṇḍî.
Râjâ Rasâlû and Mahtâ, from Karnâl.
Râjâ Hari Chand, from Karnâl.
Rânî Adkik Anûp Dei, daughter of Râjâ Sirkat (or Sirikap), from Jalandhar.

Sarwar Class of Legends.

Life of Sakhi Sarwar Sultân, from Firozpûr.
Sakhî Sarwar and Dâñî, from Firozpûr.
Sakhî Sarwar's Marriage, from Firozpûr.
Sakhî Sarwar and Jâtî, from Firozpûr.
Sakhî Sarwar and 'Isâ Bâniyâ, from Jalandhar.
Sakhî Sarwar and 'Isâ Bâniyâ, from Ambâlâ.

Legends of Saints.

Marriage of Ghâzi Sâlâr, from Ambâlâ.
Story of Dhannâ, the Bhagat, from Amritsar.
Story of Nâmdeo, the Bhagat, from Amritsar.
Lohârî Jalâlî and 'Ude Shâh Faqîr, from Jalandhar.
Story of Ballâ Shâh, from Kapurthalâ.
Story of Sayyid Bhîk, from Kapurthalâ.

Legends of Kings.

Râjâ Chandarbân and Rânî Chandkanwâr, from Jaladhar.
Râjâ Rathan Sain, from Jalandhar.
Râjâ Pirthî Singh, from Jalandhar.
War of Salîm Shâh with Khân Khawâs, from Kapurthalâ.

ON A MEXICAN MUSTANG THROUGH TEXAS

FROM THE GULF TO THE RIO GRANDE.

By ALEX. E. SWEET, AND J. ARMOY KNOX,
Editors of "Texas Siftings."

ENGLISH COPYRIGHT EDITION.

"It would be easy, did space allow, to quote a dozen good stories from Messrs. Sweet and Knox's book; and they have much of interest to say respecting ranches devoted to the multiplication of sheep, goats, geese, and even of camels. The book is amusing."—*The Saturday Review*.

"... It certainly succeeds in making one laugh without intermission."—*Pall Mall Gazette*.

"The authors started from Galveston and made their way to Austin mounted on two mustangs. Their descriptions of what they saw and what they did not see are graphic and bright. They put into the mouth of any character, real or imaginary, whom they happen to meet in the flesh or in the spirit any good story which they chance to remember at the moment; and they have thrown in a good deal of really valuable information about the agricultural and mineral wealth of Texas. The result is a very readable and very humorous book."—*St. James's Gazette*.

Second Edition. Crown 8vo. cloth, pp. xx.—215. Price 7s. 6d.

ESOTERIC BUDDHISM.

By A. P. SINNETT,

Author of "The Occult World," President of the Simla Electic Philosophical Society.

"Mr. Sinnett delivers his gospel with much clearness and obvious good faith."—*The Graphic*.

"We have carefully read Mr. Sinnett's 'Esoteric Buddhism,' and we strongly recommend all who take any interest in transcendental speculation to do the same. It is one of those fascinating books which defy you to lay them down after you've once begun, or to forget after you've once read them. It falls in so well with that craving for certainty about the after life which is felt all the more widely now that so many are deeply dissatisfied with the popular conceptions of heaven and hell. Not till one has read many chapters does one pause to ask how Mr. Sinnett came to know all this. In his former book, 'Occult World,' he answered this question at length. Here he merely states the fact that certain masters of occult science, both in Tibet and in Southern India, felt the world was ripe for the disclosures which he has been commissioned to make."—*Saturday Review*.

A Remarkable Record of Experience and Research in connection with the Occult Science of the East.

"Mr. Sinnett's book is intensely interesting to all persons who can think. It is brightly, lucidly, logically written; cool headed, perfectly dispassionate."—*The Medium and Daybreak*.

"The philosophy that it contains is clearly stated, and affords rich material for thought. The facts recorded are set forth with scientific accuracy, and must profoundly impress the careful and candid reader."—*Light*.

"The author, who evidently in perfect faith makes such astounding statements, is a man of exceptional ability and unquestionable integrity."—*Vanity Fair*.

"This is an excellent work, that shows the real nature of the Hindoo adepts who for centuries past have wielded the sceptre of occultism in India."—*Public Opinion*.

"The book starts a host of vague speculations in the mind of the reader, and startles and fascinates him."—*Home News*.

"The author is true to his convictions, and has taken a bold and honest stand upon them before the public."—*Spiritualist*.

These Lectures were originally delivered to the Students of the Royal Academy during the years 1876 to 1882. The author now submits them to the general public, and if any excuse for his presumption is needed, it must be looked for in the numerous and attentive student audiences he always has had, and who, by their evident appreciation of his teaching, have fostered the idea that a selection from the Lectures might prove interesting to others outside the Academic walls.
